  - *Oral and written feedback and recommendations*
- 

**W**hen a priest or religious is struggling, it can be difficult to know what steps to take next.

Saint Luke Institute offers professional consultation services, including intervention strategies and evaluations.

The evaluation is a five-day, comprehensive spiritual, psychological and physical assessment. At the conclusion, our team of experts provides oral feedback and recommendations, and a written report. Leadership and the individual have the information and recommendations they need to inform next steps.

Recommendations are tailored to the individual and may include individual or group therapy, spiritual direction, follow-up by a physician or residential treatment.
